EDUCATION

Rutgers University, New Brunswick, NJ - B.S. in Data Science Economics Track
Expected May 2027

SKILLS

Python, R, C, C++, SQL, Git, Pandas, XGBoost, Scikit-learn, Data Analysis, Financial Modeling, Tableau, API Integration, Sales, Leadership, Public Speaking, Event Planning, GTM, web development, Next.js, Supabase, PRDs, App Development, Vision Setting, A/B Testing, Figma

EXPERIENCE

True Exchange, New Brunswick, NJ - Startup Intern
Dec 2024 - Jan 2025

- Developed interactive dashboards in Tableau tracking KPIs, giving leadership a clear idea of growth metrics
- Cleaned and analyzed market datasets (5k+ records) to identify market trends supporting strategic decisions
- Automated reporting workflows using Python, reducing manual data processing time by ~ 30%

True Exchange, New Brunswick, NJ - Data Analyst Intern
May 2025 - August 2025

- Conducted competitor market analysis across 20+ firms, creating insights that guided feature design decisions
- Built 5 internal presentation decks communicating growth and future goals to leadership and investors
- Developed automated data pipelines to improve data accuracy and streamline reporting workflows onto Slack

True Markets, New York, NY - Product Management Intern
May 2026 - Current

- Led the Rewards Program for retail traders, getting to design both a domestic and international reward system that would incentivize users to sign up, fund and trade on our platform
- Helped curate and maintain a growing email list to keep users (300 emails) updated on all of our products
- Part of a small group that is front-running the development of both our mobile app and website adding several features and pages that were sent to production

PROJECTS

Tablebid — Founder (*Ongoing*) | tablebid-gold.vercel.app

- Built and launched a live auction marketplace where NYC restaurants sell their hardest-to-get reservations to the highest bidder (Next.js, Supabase, Stripe, Vercel)
- Designed the auction system: proxy bidding, card holds released when outbid, and soft-close timing, monetized through a 5% platform fee

Loan Pricing PRD — Product Case Study | GitHub

- Analyzed 2.26M Lending Club loans and 27.6M rejected applications in SQL to test how income is priced into credit risk
- Found that in grades E–F, borrowers earning $40–60k default more than those under $40k (up to 4.9 pts, 2013–2016), despite income being priced as a uniform discount
- Wrote a PRD defining goals, non-goals and KPIs, including a primary default-rate metric against a matched control and an A–C guardrail

Algorithmic Trading Bots (*Ongoing*)

- Built multiple trading bots using Python and machine learning to generate real-time buy/sell signals
- Designed and trained models on historical data using scikit-learn, XGBoost, and Optuna
- Deployed a live trading bot running via GitHub Actions, automating daily predictions and model updates
- Integrated APIs such as Polygon.io, yFinance, and Telegram for data, trade signals, and notifications
